📍 Florianópolis, Santa Catarina - Brazil

1. EDUCATION

2017 - Present. Undergraduate in biological sciences, UFSC, Brazil.

2. PROFILE

I am currently working on the Marine Macroecology and Biogeography lab under the supervision of Prof. Dr. Sergio Floeter. My main research is focused on reef fish interactions, especially analyzing feeding pressure at Bali- Indonesia. I already worked on the outreach project "Spreading marine biodiversity knowledge through the production of social medias" where I created the lab's instagram

3. ACADEMIC SCHOLARSHIPS

2018-2019. Outreach project - Spreading marine biodiversity knowledge through the production of social medias

2020-Present. Outreach project - Spreading marine biodiversity knowledge through the production of social medias

2022-Present. Scientific project - Comparação das relações tróficas entre peixes recifais e bentos em um gradiente de riqueza de espécies

4. RELEVANT INFORMATION

Languages

Portuguese (Native Language),
English (Advanced)
Spanish (Intermediary)

Diving qualifications

PADI Open Water Diver
PADI Advanced Open Water Diver

5. SOCIAL MEDIA AND EXTERNAL COMMUNICATIONS

Publications

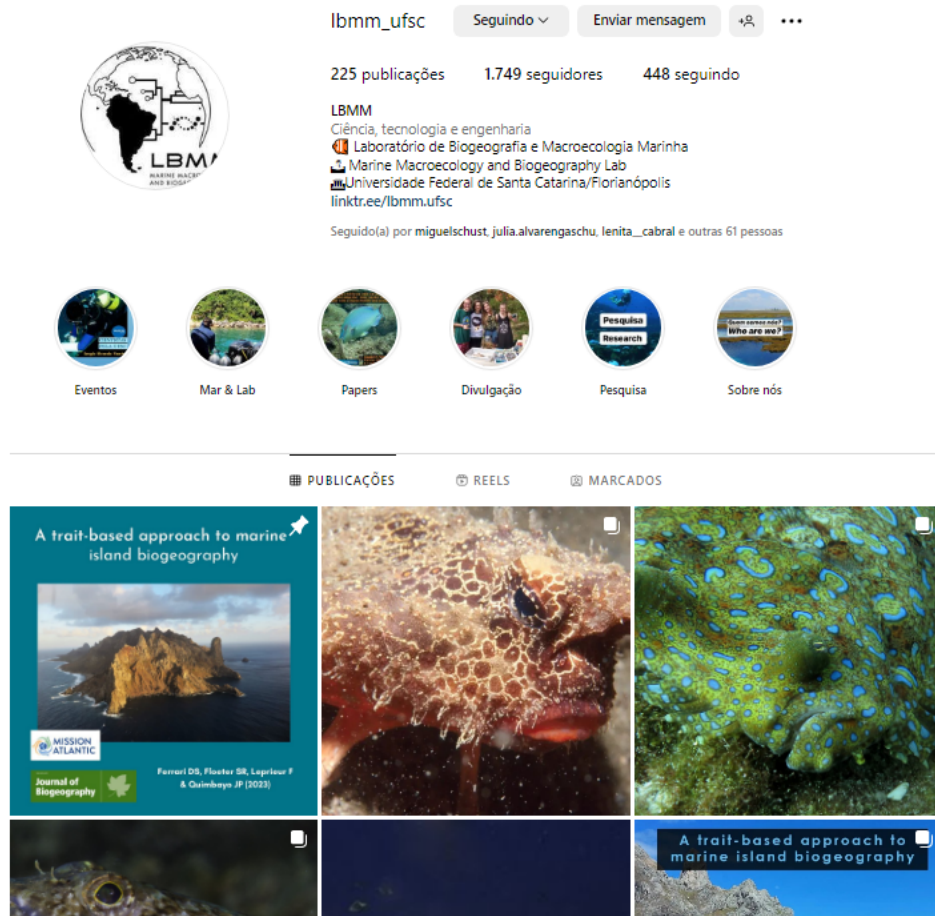

Figure 2: LBMM's Instagram, that I created at 2019 to publish our research and to share with the community the marine science.

Participation in Science fair

Figure 3: Science fair in the parks and public locals speaking about diversity, ecology of reef fish from the Atlantic Ocean.

Video Production

2019 - Apresentando o LBMM / Introducing the LBMM - https://www.youtube.com/watch?v=J3LcYwpSYes&ab_channel=LBMM
